Sample First Jobs, 6-months Out, 2006-11

Our graduates take their first jobs in a vast range of environmental fields domestically and internationally, covering everything from forest or wildlife conservation with large international non-government organizations to industrial sustainability for small New England manufacturers. For complete first job listings by year, see the pdfs below. [Representative positions from 2006-11.](#)

Post-Graduation Employment Data

A survey is taken six months following graduation each year, to determine the academic and employment activities of recent FES graduates. These summaries provide employment statistics including salary information. The results of the surveys from the classes of 2008-11 are given below.

Summer Internships & Research

Students are required to complete internships or research projects as part of their masters program at FES. Summer work takes place locally, nationally and internationally. See below for the most recent data on our students' summer work.
